

I am a senior citizen who emphatically endorses leaving the Indiana No-Call legislation as is, and NOT replacing it with a diluted federal version of legislation. I finally have some peace in my household without being bombarded with telemarketers, fundraisers, etc. I do not have the income to donate funds or buy merchandise, nor do I have the energy to answer the phone constantly with these cleverly disguised callers. Please leave this matter up to the individual states to handle. It seems we've done a pretty good job on our own without federal interference. Thank you.
